Full stack web developer with a background in Emergency Medicine, worked at the forefront of the Covid crisis, managing EMS teams and testing centers. Veteran of the United States Air Force, leveraging skills in all prior fields to provide excellent project management, strategy and implementation. Earned a certificate in Full Stack Web Development from Northwestern University Coding Boot Camp. Developed multiple applications including: A proof-of-concept website to connect workers with unions, an application to hold workplaces accountable for their safety protocols, and many more you can find on my GitHub.

TECHNICAL SKILLS

- HTML5
- CSS (Vanilla, Bootstrap, Materialize)
- JavaScript (jQuery, Node, React, Sequelize, Express)
- Databases (MySQL, MongoDB)
- API's

PROJECTS

StageCoach

Github: <https://github.com/MattReisdorf/StageCoach>

Deployed: <https://northwestern-stagecoach.herokuapp.com/>

- Summary: Created to help bridge the gap between small musical venues and local artists. Utilized an MVC structure to render database calls and dynamically display react pages and components. Data is stored with Jaws on Heroku, featuring user password encryption with bcrypt.
- Role: Project Manager
- Tools: React, MySQL, Node, Express, JavaScript, Bootstrap, Sequelize, Axios, MVC, CSS, bcrypt, and dotenv

Rate My Workplace

Github: <https://github.com/melanieuhrich/Rate-My-Workplace>

Deployed: <https://rate-my-workplace.herokuapp.com/login>

- Summary: Built to allow employees to rate their workplaces based on safety criteria. We completed this project by our deadline of 4 days. Used a Model-View-Controller design to dynamically create web pages utilizing handlebars. Data is stored with Jaws on Heroku, or locally with MySQL.
- Role: Project Manager
- Tools: MySQL, MVC, dotenv, Express, Sequelize, Handlebars, dotenv, JavaScript, bcrypt, and CSS

Team Profile Generator

Github: <https://github.com/Vygoth/Team-Profile-Generator>

Deployed: Command Line Application

- Summary: Built to allow workplaces to generate an HTML page of a team with their contact information. We utilized a class constructor model for our worker creation. We also included a test suite to allow users to test classes.
- Role: Project Manager
- Tools: Bootstrap, CSS, Inquirer, JavaScript, test files

Unify

Github: <https://github.com/Vygoth/Unify>

Deployed: <https://vygoth.github.io/Unify/>

- Summary: Built as a proof-of-concept to help bridge workers with unions. It utilizes multiple API's, including Google Maps, a Google scraper, and a geolocator. We were able to complete our concept build in 5 days, start to finish.
- Role: Project Manager
- Tools: Materialize, CSS, jQuery, JavaScript, Zenserp, Google Maps API, Google geolocator API, local storage

EXPERIENCE

Full Stack Web Developer

Chicago, IL

Northwestern Medicine

Chicago, IL

Emergency Medical Technician

Jan 2019 - Nov 2020

Afforded the opportunity to make genuine positive impacts on the well being of patient's and their families. Consistently assigned both acute and "VIP" patients.

- Concisely summarized patients' physical status and complaint to the provider.
- Executed all EMT tasks with efficiency and the highest standard of care.
- Operated multiple emergency medical testing spaces at onset of Covid-19 crisis.
- Performed medical interventions to help ensure patient survival.
- Assisted attending physicians with minor invasive procedures.

Experimac**Chicago, IL***Assistant Manager**Feb 2018 - Dec 2018*

Starting as a temp intern, earned the opportunity to work as a full time repair technician, furthered progress to assistant manager. Increased company revenue, employee morale, and customer retention.

- Expert in machine disassembly and testing.
- Advanced software/hardware repair services.
- Oversaw daily operations and logistics to ensure efficient workflow and maximize productivity.
- Built/maintained client base through exceptional customer service.

Microcenter**Chicago, IL***Lead Salesperson**Dec 2016 - Aug 2017*

Entered position with limited knowledge of product, quickly learned from peers and personal research key selling points and solutions for common customer concerns, became top selling associate in department. Sent as liaison to corporate events to represent the department and bring back cutting edge product information with selling strategies.

- Created a top tier client experience through extensive product knowledge.
- Utilized relationships with vendors to provide clients with complete solutions.
- Provided expert level troubleshooting to clients while upselling essential products.
- Maintained high client retention while cultivating new client growth.
