Professional Summary

Full-stack developer with professional hands-on experience and a passion for writing clean, reliable code. Seeking to add more development skills to my repertoire and thrive in a position that leverages teamwork and efficiency.

Technologies & Skills

React.js	Node.js	MongoDB	SQL & NoSQL	REST API	Bootstrap
HTML/CSS	JavaScript	jQuery	WordPress	Git	Sequelize
Express.js	Materialize	Gimp	Leadership	Teamwork	Communication

Experience

Austin Web and Design, Austin TX

Developer, 8/2021 - Ongoing

Frontend web app construction utilizing wordpress per mockup specification. Client relationship building and negotiation on proposed projects. Custom plugin creation as needed per customer request. Custom scripting in javascript / php for clients where tasks could not be accomplished by existing tools. Soon to be promoted to lead developer due to aptitude.

Hematogones

Lead Developer, Project Duration: 1 Month

Rebuilt and implemented the Placenta Weights and Reports app. Utilized a myriad of technologies including Handlebars, JavaScript, jQuery, Node.js, Express.js, and SQL. This app is a collection of placenta information from around the world to revolutionize the way pathologists reference placenta data. (*https://hematogones.com/surg-path/placenta*)

StageCoach

Lead Developer, Project Duration: 2 Weeks

This application was created to help bridge the gap between small musical venues and local artists. It was built using React, MySQL, Node, Express, and dotenv. This application utilizes an MVC structure to render database calls and dynamically display react pages and components. Data from this site is stored with Jaws on Heroku. This application features user password encryption with bcrypt. (*https://northwestern-stagecoach.herokuapp.com*)

Education

Northwestern University

Evanston, IL - Full-Stack Web Development Certificate (June 2021)

Malcolm X

Chicago, IL - Emergency Medicine EMT-B (Jan 2019)
